

IDeA STATE FACULTY & STUDENT PROTEOMICS VIRTUAL WORKSHOPS

HOSTED BY THE IDeA NATIONAL RESOURCE FOR QUANTITATIVE PROTEOMICS

Targeted Proteomics Workshops

February 9-10, 2021
February 16-17, 2021

Discovery Proteomics Workshop

February 23-24, 2021

The IDeA State Faculty/Student Proteomics Workshops will emphasize new approaches that researchers can implement in their own laboratories and how to best utilize the resulting data to be more competitive for extramural funding. These workshops will be virtual with topics including fundamental principles of proteomics, experimental design for proteomics experiments, sample preparation and fractionation, data collection, and data analysis and interpretation. Workshops will include dedicated time for interactive breakout sessions.

For more information, visit the IDeA National Resource for Quantitative Proteomics website (IDeAResourceProteomics.org) or contact Heather Douglas (HLDouglas@uams.edu). Applications are available here. Preference is given to researchers in IDeA states. Only 20 slots are available per workshops and attendees will be selected for regional representation. Deadline to apply is January 22, 2021.

Workshops are supported by the IDeA National Resource for Quantitative Proteomics (R24GM137786), Arkansas INBRE (P20GM103429) and Oklahoma INBRE (P20GM103447).
