

Internship for Graduate Students and Post-doctoral Researchers in IDeA States

Hosted by the:

IDeA National Resource for Quantitative Proteomics

Are you interested in including quantitative proteomics in your current research? The IDeA National Resource for Quantitative Proteomics is seeking current **graduate students or post-doctoral researchers** to apply for a short-term internship, which will provide exposure to daily operations and best business practices in a core facility. Applicants should have current, ongoing research that would benefit from an in-depth quantitative proteomics analysis and have interest in exploring a career in a proteomics core facility. Awardees will receive a voucher for one quantitative proteomics analysis that will be completed as part of the on-site internship.

Purposes:

- Provide on-site training to graduate student or post-doctoral researchers in state-of-the-art proteomics workflows
- Inform graduate students or post-doctoral researchers of career options in research core facilities

Logistics:

- 2-week stay at the IDeA National Resource for Quantitative Proteomics located in Little Rock, Arkansas.
- Travel, lodging, meals, and one quantitative proteomics analysis are provided
- 2 awards will be made annually

Requirements:

- Applicants must be current graduate students or post-doctoral researchers performing NIGMS relevant research at an institution located in an IDeA State. For more information on IDeA states, see [here](#)
- Submission of an on-line application [here](#)
- Applicants must perform a pre-submission consultation at least 1 week prior to the application deadline with Dennis Province, PhD (Proteomics_Internship@uams.edu).
- Only one application per laboratory per year

Important dates:

- Applications due: August 16, 2021
- Award notification: September 1, 2021

Questions can be directed to Dennis Province, PhD Proteomics_Internship@uams.edu
