

FUNDAMENTALS OF PROTEOMICS WORKSHOP

HOSTED BY THE IDEa NATIONAL RESOURCE FOR QUANTITATIVE PROTEOMICS

Discovery Proteomics Workshop

February 24-25, 2022

University of Arkansas for Medical Sciences
Little Rock, AR

The Fundamentals of Proteomics Workshop will emphasize new approaches that researchers can implement in their own laboratories and how to best utilize the resulting data to be more competitive for extramural funding. Attendees will receive lecture-style presentations on a variety of topics such as fundamental principles of proteomics, experimental design for proteomics experiments, sample preparation and fractionation, data collection, and data analysis and interpretation. In addition to lecture-style presentations, a series of breakout sessions will be offered on bioinformatics and experimental design.

Applications are available [here](#). For more information, contact Heather Douglas (HLDouglas@uams.edu). Preference is given to researchers in IDEa-eligible states. The 2022 workshop will be in-person, but number of attendees will be limited to comply with COVID-19 guidelines. Travel and lodging are provided to attendees. Deadline to apply for all workshops is January 21, 2022.

Workshop is supported by the IDEa National Resource for Proteomics (R24GM137786). Additional support is provided by Arkansas (P20GM103429) and Oklahoma INBREs (P20GM103447).
