Oklahoma Medical Research
Foundation

February 9 - 10, 2022
University of Arkansas for Medical Sciences
Little Rock, Arkansas

The Proteomics Core Directors and Staff Symposium will emphasize new, cutting-edge technologies and approaches to discovery-phase proteomics that can be translated into practice at your home institution. The 2022 symposium topics will include experimental design for proteomics experiments, sample preparation and fractionation, human tissue proteomics, and post-translational modifications. Presentations will also cover non-scientific topics such as best business practices and core administration.

Applications are available [here](#). For more information, contact Heather Douglas (HLDouglas@uams.edu). Preference is given to researchers in NIGMS IDeA-eligible states. The 2022 symposium will be in-person, but number of attendees will be limited to comply with COVID-19 guidelines. Travel and lodging are provided to attendees. Deadline for applications is January 14, 2022.

Workshop is supported by the IDeA National Resource for Quantitative Proteomics (R24GM137786). Additional support is provided by the Arkansas (P20GM103429) and Oklahoma (P20GM103447) INBREs.
